PRODUCT DESIGN CONCEPT

DOUBLE-TONGUE PUNT KICKER

A playful new take on the backyard punt. This wearable concept pairs a padded striking tongue with a spring-supported lower base, bringing a distinctive new look to kids' football play.

THE PRODUCT CONCEPT

Double-layer tongue: a padded upper contact surface with springs between the layers.

Either-foot design: a symmetrical attachment intended for left or right shoes.

STRAP ON. GET READY TO PUNT.

Wrap-under straps: straps descend from the product sides and overlap beneath the sole.

Adjustable fastening: hook-and-loop closures secure the attachment around the shoe.
